MARKET DATA · 2025–2026

# Brand competition: the numbers behind fashion's biggest players

Latest annual results for global fast-fashion leaders and India's largest fashion retailers, plus the race to deliver fashion in under an hour.

Forecut Editorial · 11 October 2026

**€39.9 bn**
Inditex net sales, FY2025

**$41.9 bn**
Shein revenue, 2025

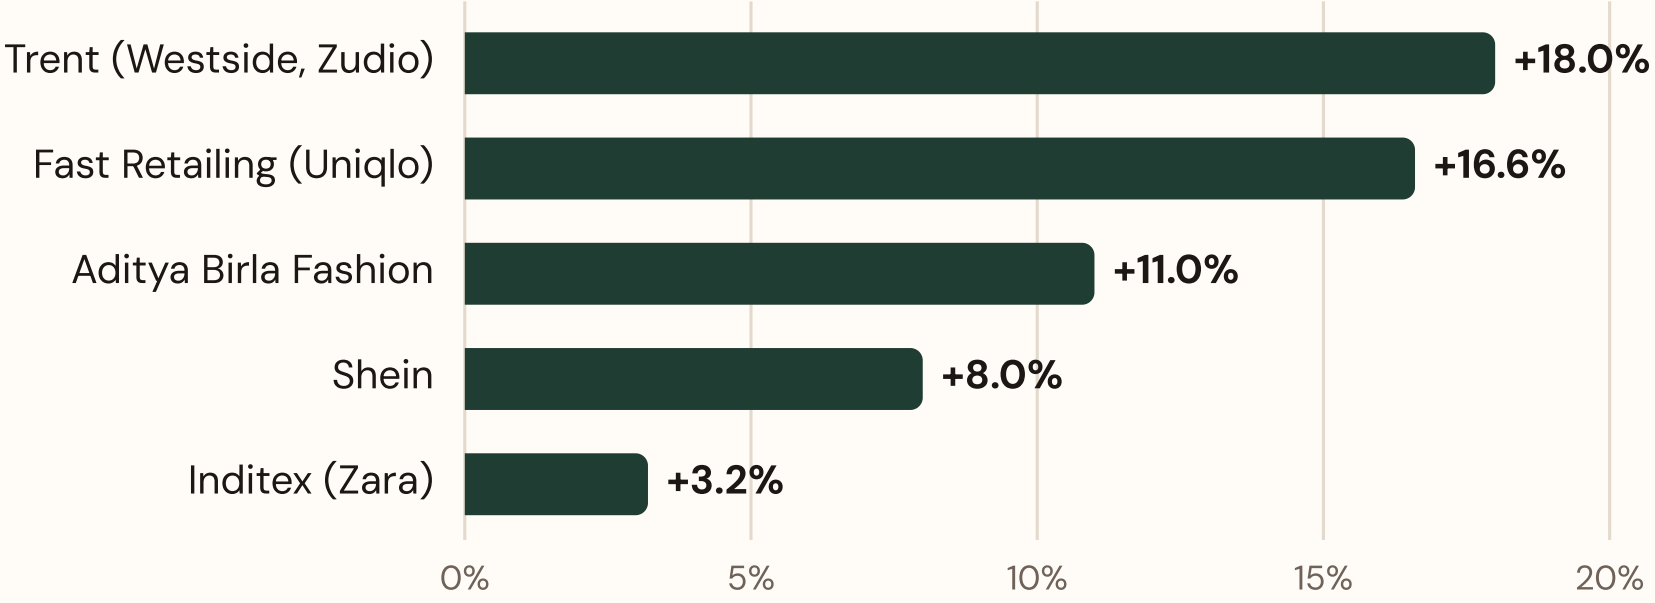

**₹19,701 cr**
Trent revenue, FY26 (+18%)

**963**
Zudio stores, Mar 2026

## Who is growing fastest

Reported revenue growth in each company's latest full financial year. Periods differ, so compare direction rather than exact rank.

**Revenue growth, latest full year**
Percent change versus the previous year, as reported

## The results

Figures as reported by each company or the cited coverage. Currency conversions are those given in the sources.

| COMPANY | PERIOD | KEY FIGURES | SOURCE |
|---|---|---|---|
| **Inditex (Zara)** | Spain · FY2025 (Feb 2025 – Jan 2026) | Net sales €39.86 bn (about $46.3 bn), +3.2% (+7% at constant currency); net profit €6.22 bn, +5.8%. | FashionUnited |
| **Shein** | Global online · 2025 | Revenue $41.85 bn, +8% (from +20.7% in 2024); net income $2.06 bn, -38.7%. Q1 2026: revenue $9.05 bn (+1.1%) and a net loss of $99 m. | Inside Retail |
| **Fast Retailing (Uniqlo)** | Japan · FY2026 (to Aug 2026) | Revenue ¥3.96 trillion (about $25 bn), +16.6%; operating profit ¥743.1 bn, +31.7%. Uniqlo International revenue ¥2.41 trillion, +26.2%. | FashionUnited |
| **H&M Group** | Sweden · FY2025 (to Nov 2025) | Net sales about SEK 228.3 bn; operating profit about SEK 18.4 bn, up from SEK 17.3 bn. | Retail Gazette |
| **Trent (Westside, Zudio)** | India · FY26 (to Mar 2026) | Revenue ₹19,701 crore, +18%. 963 Zudio stores (including 6 in the UAE, +198 in the year) and 300 Westside stores (+52); 1,286 stores in total. | Storyboard18 |
| **Aditya Birla Fashion & Retail** | India · FY26 (to Mar 2026) | Revenue ₹8,177 crore, +11%; EBITDA ₹967 crore (11.8% margin); consolidated net loss ₹830 crore. 1,273 stores; Pantaloons 399 stores. | Apparel Resources |

## India's fashion delivery race

Quick-commerce fashion players and their delivery promises, as reported in July 2026. India's quick-commerce sector is estimated at about $8.3 bn GMV in 2026.

| PLAYER | MODEL | DELIVERY PROMISE | FOOTPRINT / FUNDING |
|---|---|---|---|
| **Myntra M-Now** | Dark stores | 30 min – 2 hrs | 10+ cities, 90+ dark stores |

| PLAYER | MODEL | DELIVERY PROMISE | FOOTPRINT / FUNDING |
|---|---|---|---|
| **AJIO Rush (Reliance)** | Store-fulfilled | 4 hrs (testing 2 hrs) | 600+ cities, 1,700+ stores |
| **Zilo** | Dark stores + brand outlets | Under 60 min | Mumbai; $15.3 m Series A (Feb 2026) |
| **Slikk** | Dark stores | Under 60 min | Bengaluru-led; $13.5 m raised |
| **KNOT** | Dark stores | Under 60 min | Mumbai; $5 m (Dec 2025) |

## What this tells you

- Value fashion is winning in India: Zudio added nearly 200 stores in a year.
- Globally, Uniqlo is outgrowing Zara and Shein in percentage terms, while Shein's growth and profits have slowed.
- Speed is the new battleground: fashion delivered in under an hour is spreading from metros to tier-II cities.
- Scale is not profit: ABFRL grew revenue 11% but still reported a net loss.

## How to use these numbers

Company results tell you where shoppers are spending, not what every brand should copy. Read them for direction: which price levels are growing, which formats are winning (stores, apps or delivery in under an hour) and which regions are carrying growth. Revenue growth shows momentum; store counts show where a retailer is betting its capital; profit margins show whether that growth is healthy.

Compare like with like. Financial years end in different months (Inditex in January, Uniqlo's parent in August, Indian retailers in March), currencies move and some companies report only sales while others report profit. Use the percentage change in each company's own currency as the fairest comparison, and treat exact rankings with caution.

**Reading it by region.** In **Asia**, value fashion and fast store roll-outs (Zudio in India, Uniqlo in China and Southeast Asia) are setting the pace, while quick-commerce delivery is reshaping how Indian shoppers buy basics. In **Europe**, large retailers are growing more slowly and investing in fewer, larger stores and stronger online returns policies. In **North America**, ultra-fast online players face rising tariff and customs costs on low-value parcels. In **South America**, **Africa** and **Oceania**, global chains compete with strong local and second-hand markets, and currency swings can change prices quickly.

**What smaller brands can take from it.** You do not need the scale of the leaders to learn from them. Watch the price points where they are growing and decide whether to sit just above them with better fabric and fit, or in a niche they do not serve (handloom, occasion wear, sizes or regional styles). Speed matters more than ever, so shorten sampling, hold a small reserve of fabric for reorders of best sellers, and make delivery promises you can keep.

**How often are these figures updated?** Forecut refreshes the tables when companies publish annual or important quarterly results, usually several times a year.

**Why are Shein figures less detailed?** Shein is a private company, so its figures come from press coverage and filings rather than full public annual reports.

**Should I use these numbers for investment decisions?** No. They are summarised for fashion planning and may be restated by the companies; they are not investment advice.

Financial figures are summarised from the cited public sources as of October 2026 and may be restated by the companies. This is not investment advice.
